

BGDSHR RETRACTABLE DOCK SHELTER

FEATURES AND SPECIFICATIONS

Designed to accommodate 10.5' x 10.5' door openings, the BGDSHR provides full access to the rear of the trailer. The collapsible frame retracts on impact, reducing pressure against the curtains and building wall and preserving both equipment and building integrity. Stays in the head and side curtains help to maintain constant pressure against the trailer during loading and unloading, ensuring a tight seal that keeps external temperatures and airborne contaminants at bay.

Standard units seal trailers 12' to 13.5' high on a typical 4' dock height.

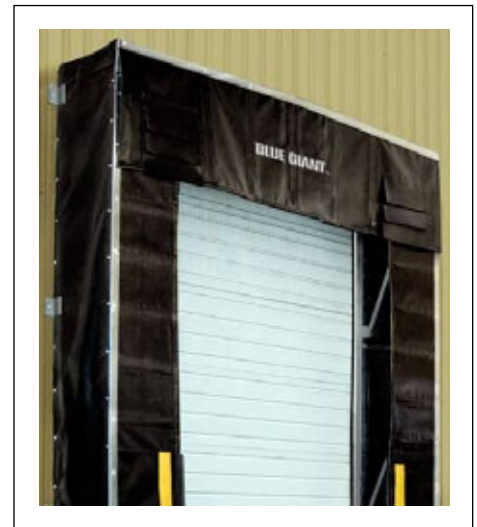

STANDARD FEATURES:

- 24" projection
- 22 oz. Hi-Tear vinyl base fabric
- Resilient head unit measuring 138" wide, with a 24" projection and a 36" drop curtain
- Protective wear flaps / pleats on head curtain
- High visibility 24" yellow guide stripe
- Galvanized tubular framing
- Replaceable foam bottom pads seal gap between truck and building
- Peaked header frame to divert water from dock floor
- Galvanized mounting hardware

For maximum value and performance, the BGDSHR can be constructed from our premium durability fabrics (see chart for materials, weights, and available colors).

ADDITIONAL OPTIONS INCLUDE:

- Double layer of protective fabric on bottom 24" of side curtains
- Extra width
- Extra height
- Additional drop in head curtain
- Additional width on side curtains
